Hallo Emilio:)

In our texts migration is a big issue, but sure there are issues I want to write about, and that includes Sandleiten.

Sandleiten is small, and many know it well, and we also have very many Turkish neighbors. When I started rapping, they found it not so right, they said, Enes - my brother should do it, because I'm going to marry someday and this is not okay. But I believe because I politically'm traveling, and I think they feel in our texts, a neighbor said to me: I should rap about her life, she was beaten, forced Married.

And this is for me very important, because this women normally dont tell about their story, but she tells to me her story...!! And in my next song I want to write about this theme. But I dont now, how I will do this...!! Its difficult:) because I must to tell this story, so that the other women, who are in the same situation, that I can give with my lyric power and energie:)

a big hug,

Esra
